TEXT TITLE: Are we too dependent on technology? DATE: _____

TEXT TYPE: Blog Post AUTHOR: Terry Brown

I. PRE-READING (10 POINTS)

A. Complete the table with the headings, subheadings, and visual titles/descriptions from the text. Provide at least 2 entries for each column.

Headings	Subheadings	Title/Description of Visuals
• Are we too dependent on technology? • Are we too dependent on technology	• Who needs knowledge • Are there business cost of being too dependent on technology	An MRI brain scan image comparing hippocampus activity, caption notes enlarged in London Taxi Photo of a robot/AI concept caption: Artificial Intelligence and Machine concept, bigstock.

B. Fill the table with information that you already know about the topic (K), you wonder about the topic (W), and you will learn after reading the text (L). Fill the L Column after reading the text. Provide at least 2 entries for each column.

K	W	L
Technology like smartphone has made life easier Many people use GPS instead of memorizing routes.	Does relying technology makes us less intelligent Is there an impact on over reliance on technology	I found that GPS switches off the hippocampus. In 2019 83b spent on corporate training yet it's a failure since 70% of the employees did not retain the information for more than 24 hours.

II. READING (30 POINTS)

A. Fill the table with specific details from the text and inferences that can be drawn from it. Provide at least 2 entries for each column.

Details from the Text	Plausible Inferences
London taxi drivers need to memorize routes in order to pass the test.	Regularly training the memory makes our brain physically enlarge the structures of it.
Jim Kiwik who is a memory expert calls this the digital deluge where 200,000 old brain are overwhelmed.	As organizations increasingly rely on digital tools employees memory and cognitive engagement may decline, ultimately undermining business performed despite technology efficiency.

B. Figure out the meaning of the technical term from the text. Write the technical term, indicate the clue from the text, and use the term in your own sentence. Provide at least 2 entries for each column.

TEXT TITLE: Are we too dependent on technology? DATE: _____

TEXT TYPE: Blog Post AUTHOR: Terry Brown

Technical Term	Context Clue (i.e., antonym, synonym, examples, description, word parts, definition or any clues in the text	Use each technical term in a sentence
1. Hippocampus	Described as the brain part that forms cognitive maps; activated when navigating, "switched off" with GPS — description clue.	The hippocampus tends to shrink in older adults with dementia, showing its role in memory.
2. Cognitive	Used in "cognitive map" and "cognitive ability," referring to mental processes — description/word-parts clue (Latin: *cognitio* = knowledge).	Regular readers tend to develop stronger cognitive skills like critical thinking.
3. Digital deluge	Jim Kwik's term for the overwhelming flood of digital information; "deluge" = flood, "digital" = technology — definition/word-parts clue.	Constant notifications and social media create a digital deluge that makes focus difficult.
4. Knowledge economy	Described as a fast-paced economy where success depends on mastering large amounts of information — definition clue.	Countries that invest in education tend to thrive in today's knowledge economy.
5. GPS (Global Positioning System)	A navigation technology giving turn-by-turn directions, removing the need to memorize routes — description/examples clue.	Many drivers rely so heavily on GPS that they struggle to navigate without it.

C. Supply the missing information below:

1. Topic of the text: Excessive reliance of human on technology
2. Writer's opinion about the text's topic: The author believes that human have become dependent on technology too much, and it affects our memory.
3. Support for writer's opinion (e.g., evidence such as facts, testimonies, examples, etc.):
    a. A 2017 study shows that GPS use deactivates the hippocampus – the brain region for memory and navigation.
    b. Jim Kiwik warns that "digital deluge" overwhelms our brain.
    c. US spent 83 billion on 2019 to train corporate employees yet 70% forget about it within 24 hours.

III. POST-READING (10 POINTS)

TEXT TITLE: Are we too dependent on technology? DATE: _____

TEXT TYPE: Blog Post AUTHOR: Terry Brown

A. Answer the following rhetorical analysis guide questions.
   1. What credentials does the author have which give him/her the authority to write about the topic of the text? Terry Brown is contributor to IT Chronicles professional technology publication.

   2. After considering the author's profession and affiliation, what possible biases the author might have about the topic? Brown may favor a business oriented framing over broader societal concerns. His personal admission of technology dependence could also lead him to over generalize his own experience as generalize problem.

   3. What is the purpose of the text, and how does the author accomplish that purpose? What evidence does the author use to support the main idea in the text? The purpose is to warn human that over reliance on technology harms memory and hurts businesses. The author support it by using studies and expert knowledge testimony.

   4. What specific idea/information in the text challenges or surprises you? Why? The surprising part is GPS switches off the hippocampus. I personally think that GPS are of human great invention, but there is some harm on over reliance on it.

   5. Is the style of writing suitable for the intended audience? Is it too formal or too casual? Why? He make the article engaging yet substantive, without being to casual or overly academic.
